trasporto e separazione
Transport and Separation

TRASPORTATORI SPECIALI PER CONTENITORI CHAIN CONVEYORS FOR CONTAINERS

Sviluppati su indicazioni del cliente

Built according customer needs

SERVERS DISPENSER - SERVER DISPENSER

Abbinato a nastri o robot distribuisce una quantità determinata di pezzi nei contenitori (scatole o sacchi).

Coupled with conveyors or robot distribute a certain quantity of pieces in containers.

NASTRO PIANO - *FLAT BELT*

Nastro normalmente posizionato all'interno della Pressa o della Soffiatrice

PE Posizione perpendicolare alla Pressa

PA Posizione parallela alla Pressa

PI Posizione interna alla pressa

Belt normally positioned inside the press or blower

PE – perpendicular to the press

PA – parallel to the press

PI - inside the press

NASTRO CURVO ROVESCIO SNODATO ARTICULATED CURVED BELT FOR OVERTURNING

Nastro da abbinare normalmente a Manipolatori.
 La tela SUPERGRIP aiuta il corretto posizionamento del pezzo sulla parte inclinata e accelera il raffreddamento dei pezzi deposti.

*Usually associated with manipulators.
 The SUPERGRIP belt aids correct positioning of the item on the inclined section and speeds up cooling.*

PA

NPS-SS

NASTRO PIANO SPECIALE SPECIAL FLAT BELTS

Normalmente questi nastri sono costruiti secondo le esigenze del cliente. Sono utilizzati per il convogliamento in un solo punto dei manufatti raccolti da altri nastri oppure come linee di montaggio.

Normally built to customer specifications.

Used for conveying items collected from other belts to a single point or as assembly lines.

NPS-SR

NASTRO PIANO SPECIALE CON PROTEZIONI FLAT BELT WITH GUARDS

La cella di protezione della zona di scarico del Robot, è costruita in robusto profilato di alluminio con barriere in Policarbonato, o meglio in robusta maglia metallica a norme antinfortunistiche.

The guard in the robot unloading area is made of sturdy aluminium sections with polycarbonate barriers or extra sturdy metal safety netting. EUROMAP interface, or interface for any robot.

NPS-GL

Interfaccia EUROMAP o interfaccia per qualsiasi Robot.

EUROMAP interface, or interface for any robot.

NASTRO CON VASCA PER RAFFREDDAMENTO BELT WITH COOLING TANK

L'acqua nella vasca può essere raffreddata o con un ricambio continuo, oppure, termoregolata con uno scambiatore (Optional)
La velocità dei nastri è regolabile con motovariatore meccanico

*The water in the tank can be cooled by continuous flow or thermally regulated using an optional heat exchanger.
The belt speed can be adjusted by means of a mechanical speed variator.*

AL. NV9	450	560

Sono disponibili anche TUNNEL DI ASCIUGATURA ad aria calda forzata

Tutte le parti a contatto con acqua sono in acciaio INOX AISI 304 o in materiale antiossidante.

DRYING TUNNELS with blown hot air are also available. All parts in contact with water are made of AISI 304 STAINLESS STEEL or other antioxidants.

SMATEROZZATORE RISER REMOVER

Tamburo ad aspi per il distacco dei pezzi dalla colata

Paddle-wheel drum to detach the parts from the sprue

Separatore a palette controrotanti adatto alla maggior parte delle esigenze di separazione.

Flap separator with counter-rotating blades suitable for most separator requirements

Separatore a spirale ottimo per pezzi di forma sferica.

Flap separator with counter-rotating blades suitable for most separator requirements.

Separatore a 1 - 2 o 3 rulli indicato quando è notevole la differenza di dimensione tra pezzi e colata.

1-2-3 roller separator ideal when the parts and sprue are very different size.

Comando di marcia o arresto dei nastri mediante Fotorilevatore o Sensore di Prossimità.

Belt start/stop control by means of a photoelectric cell or proximity sensor.

Metal-Detector a Tunnel o a Piastra sottotela, installabile su tutti i nastri.

Metal Detectors tunnel type or plate underbelt type can be installed on all belts.

Avanzamento temporizzato Passo/Passo.

Step by Step timer.

Variatore di velocità elettronico ad Inverter Vettoriale.

Electronic speed variator with vectorial inverter.

Variatore di velocità con Motovariatore meccanico.

Mechanical speed variator
